

Acceptance Criteria

Accept		Need Editing		Reject	
The journal is strong in all Seven areas.	The journal is good in most areas and strong in some.	The journal is good in some areas but only satisfactory in others.	The journal is satisfactory in most areas but weak in others.	The journal is weak in most areas.	The journal is very weak in all areas.

Original Innovation	Original innovation is the basic academic ethics. The author's original ideas are the fundamental element of journal publication. Originality is a form of respect for scholars.
Well Organized	If a journal's organization is unclear, the reviewer will be confused.
Format	Acknowledgement of sources using appropriate citation conventions e.g. Harvard standards. As a US publishing company, DF Press has required the author to follow US publishing rules. When the author needs to reference the text, the MLA and APA formats are the format only allowed. Other formats will be considered non-compliant.
Reliable Method	Journal methods parts can be simplified, but those parts must be repeatable. (Use these rules if the journal has experiments)
Result can be test	The essence of journal publication lies in the data. If the desired data results are obtained through fabricated data, then the results will often be false. In the statistical part of the paper, you cannot intentionally create inaccurate data to make significant differences in the results, and you cannot modify the original data. This part of the journal that reviewers look for most and will verify the content with the help of extensive information searches.
Scientific research significance	Any scientific research needs to have some research significance, and ineffective argumentation can waste many resources.
Overall Content, Structure and Quality of the Dissertation	A clear and logical arrangement of the work into sections with continuity between chapters; demonstration of effort, initiative, originality, imagination and skill in the construction and execution of the journal; putting across ideas clearly, succinctly and without grammatical and spelling errors; quality of proof-checking and overall appearance.
